Authorization for this examiner's amendment was given in a telephone interview with Donald R. Palladino on February 23, 2006.

The application has been amended as follows:

Reinstate withdrawn claim 19.

Cancel claims 9-12, 15-18, 20-22, 26 and 29-36.

The following is an examiner's statement of reasons for allowance:

The terminal disclaimers filed February 16, 2006 overcomes the obviousness-type double patenting rejections over copending application no. 11/190,666 and U.S. Patent No. 6,737,163 applied in the non-Final rejection mailed November 25, 2005 (pages 7-8).

The claims are patentable over the closest prior art of Donnelly et al. Patent No. 5,569,733 and Makhoul et al. Patent No. 5,470,886 for the reasons of record set forth on page 9 of the non-Final rejection. The claimed structure of Formula I differs from the formula of Renner Patent No. 4,562,241 in that the terminal tertiary amino groups are separated from the urethane groups by the moiety $-R_2-(O \text{ or } N(R_5))-$.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on the Reasons for Allowance."
